Strengthening the Occupational Health Expertise and Scientific Performance of Public Health Institution of Turkey

The project leading to this presentation has received funding from the EU Horizon 2020 Research and Innovation Programme under agreement No 692188. This presentation reflects only the author's views. The Research Executive Agency under the power of the European Commission is not responsible for any use that may be made of the information it contains.

Collaboration

PPT B 4.1.1 Collaboration

Learning Objectives

1. Awareness about the need for collaboration in successful workers health surveillance
2. Learning to know the main players in this field
3. Thinking about good collaborative practice

Collaboration?

Why, with who, how?

- Why?
 - Support, help, you better stand on shoulders of giants
 - Support in design, execution, implementation/ prevention
- With Who?
 - Interdisciplinary
 - Intersectoral
 - International
 - Know the Stakeholders: workers/ unions, employers, Labour Inspectors
- How?
 - Create trust; create alliances,
 - create authority, create win-win situations

PHIT as Information and Knowledge Centre on Occupational Diseases

Information notices on occupational diseases: a guide to diagnosis

International Collaboration

- Informal contacts between Institutes / WHO-collaborative Centers in OHS on methodology and rare cases like Shii Take allergies
- 2007: MODERNET: Monitoring Occupational Diseases and Emerging Risks NETWORK (Amsterdam, Manchester, Milano, Grenoble, Helsinki)
- 2010: some funding by COST (FP7) Program
- 2012 Launch of OccWatch

Modernet: Monitoring Occupational Diseases and Emerging Risks NETWORK

goals:

- New and smarter techniques for early detection of trends of occupational diseases
- Early detection of new OH risks and early search for less risky substances, technologies or working practices
- Rapid exchange of research knowledge with the use of (new) internet techniques
- Appropriate preventive action

Capture case-reports of potentially NEW work-related diseases

Critical analysis of signal: Exchange about them, seek similar cases and produce a common expertise summarised in a conclusion / briefing note, including proposal for actions to be taken

Dissemination of this briefing note with OcWatch stamp to national agencies, which will be able to raise, or not alerts

Collaboration: conferences, working visits, publications

2011 Xi'an International Neurotoxicology Conference

June 05-10, 2011 Xi'an, China

of the author: Ruben

• European List of Occupational Diseases

“Report on the current situation in relation to occupational diseases' systems in EU Member States and EFTA/EEA countries”

Collaboration!

Necessary to achieve your goals

- In different phases:
 - design,
 - execution,
 - implementation/ prevention
- At different levels
 - Local and International
 - In public and private sector
 - Create trust; create alliances,
 - create authority, create win-win situations
